

Integrated Science Faculty in the College of Science Nanoscience, Neuroscience, Systems Biology, and Computational Science

As part of Virginia Tech's expanding presence in emerging interdisciplinary programs and degrees in nanoscience, neuroscience, systems biology, and computational science, the College of Science seeks to fill tenure-track or tenured faculty positions. These new faculty positions signify a continued University commitment to the importance of interdisciplinary science to help solve major societal challenges in energy, the environment, and health. The successful candidate will be expected to establish an internationally recognized research program and be an effective teacher in graduate and undergraduate courses. Appointments at the rank of Assistant, Associate or Full Professor will be made in one of the College's eight departments: biological sciences, chemistry, economics, geosciences, mathematics, physics, psychology, and statistics.

New faculty associated with these interdisciplinary programs and degrees will be expected to participate in the College of Science's recently launched Integrated Science Curriculum (www.science.vt.edu/isc) and interdisciplinary courses, which collectively serve to build strong research and educational partnerships across the sciences.

Please visit <http://www.jobs.vt.edu> and locate the correct posting. All applications must be submitted on-line.

For more information, visit www.science.vt.edu and click on links under Faculty Openings.

Consideration of applications will begin as early as January 15, 2012 and will continue until the positions are filled.

For more information, please contact:
Prof. Jill Sible and Timothy Long
Associate Deans, College of Science
(isfsearch@vt.edu)

Virginia Tech is an AA/EEO employer; applications from members of underrepresented groups are especially encouraged.
