

## Chemistry Department Research Director Nomination Form

Student's Name:

Student's Major:  Analytical  Inorganic  Organic  Physical  Polymer

After interviewing four faculty members and attending the evening research symposia, each first-year graduate student should indicate his or her first, second, and third choices for Research Director. While the Department tries to assign students to their first choices, sometimes this is not always possible because of factors such as funding, space, student distribution, and so on. For these reasons, your explanations of **all three** choices are extremely important. However if you are using the MS Word version of this form, we ask that you try to keep the total length of this form to a single page.

**First:**

**Second:**

**Third:**

Explanation of First Choice:

Explanation of Second Choice:

Explanation of Third Choice:

Return the completed form to Angie Miller by the close of business on first Monday in November.  
This form should accompany the Research Director Interview Form.
